

Stencil application

The matted side is best for stencil application although both sides are tattoo-able.

1. Degrease the area with washing up liquid and leave to dry.
2. Apply talc powder (baby powder) to the skin just before you add your stencil solution.
3. Apply stencil solution and rub on surface till becomes tacky.
4. Apply stencil and leave on the skin for around 20 mins then remove stencil paper and leave to dry for a further 20 mins. (or over night which would definately keep the stencil on).

Stencil removal

To remove a stubborn stencil marks use household bleach. Apply a blob of bleach to affected area and leave for around an hour the stecil mark will fade away in this time.

Excess ink removal

Rub vaseline into surface and wipe away with a paper towel, this will remove any excess ink
